

Kross.money

Trade crypto perps. One terminal.

1s ORDER EXECUTION	<800ms ORDER CANCELLATIONS	\$0 CUSTODY RISK	\$0 GAS FEES
--------------------------	----------------------------------	---------------------	-----------------

The market is broken.

⚠ The Problem with Today's Options

- ✗ Centralized exchanges control user funds - they can lend, invest, or freeze them.
- ✗ DeFi platforms require complex setup like wallets, seed phrases, gas fee management.
- ✗ Most retail traders quit before they ever place a trade on crypto exchanges.
- ✗ Self-custody on a DEX has always meant slower execution.

✦ The Kross.money resolution

- ✓ Sign in with Google or Apple ID - no wallet setup, no seed phrases required.
- ✓ Non-custodial smart wallets via account abstraction - technically impossible for us to touch user funds.
- ✓ Gas, abstracted away. The UX feels like a CEX but the custody doesn't.
- ✓ All trades settle permissionlessly, always-on, no single point of failure.

A four-layer architecture.

LAYER 01

Trading Terminal

- ✓ Real-time order books
- ✓ TradingView charting
- ✓ Sub-second UI responsiveness
- ✓ Built for retail & pros

CLIENT SIDE · WEB / MOBILE

LAYER 02

Non-Custodial Wallet

- ✓ Powered by Privy.io
- ✓ Smart wallet on first login
- ✓ No seed phrases, no setup
- ✓ Zero authority to move funds

PRIVY.IO

LAYER 03

Permissionless Settlement

- ✓ Direct write to L1 blockchain
- ✓ No intermediaries
- ✓ Zero counterparty risk
- ✓ Always-on 24/7

L1 CHAIN

LAYER 04

Platform Agnostic

- ✓ Terminal offline? Funds stay safe
- ✓ Balances always accessible
- ✓ Natively on underlying exchange
- ✓ You're never locked out

SELF-SOVEREIGN

A massive market. A clear path to capture it.
